Brian,

I wanted to thank you, your foreman Craig, and all of the sub-contactors that worked on Suite 705. The renovated space for the legal department is very attractive. You were aware of my concerns during the course of the project due to the fact our CEO & COO Offices are located directly below the renovated area. Management of the project was superb, not one complaint from anyone related to dust, excessive noise or messy contractors.

Both Andrea and I appreciate the efforts of everyone involved with the project. Please pass along our thanks to everyone.

Thank you for a successful project. I look forward to many more projects in the future.

John West, Director of Facilities Development
Sparrow Health System
