To Whom It May Concern:

As the superintendent of the Hanover-Horton School District, it has been my pleasure to partner with the team at Moore Trosper Construction Company (MTCC) during our recent construction project. Since March of 2019, Moore Trosper has been leading the construction efforts of the school district and represented Hanover-Horton with contract negotiations, schematic design, bid development, and construction contract awards. They were right by our side for every step of the process from before our election until the project wrapped up a little over four years later. It has been a very positive experience working with MTCC.

Our partnership took us through significant challenges that neither of us could have ever predicted or anticipated. Thankfully, their knowledge and overall experience was able to keep our project on track despite the numerous impacts the pandemic had. When issues did pop up, which they will on any construction project, I found their assistance and guidance do be incredibly beneficial to me personally as this was my first bond-funded construction project as a superintendent. When needed, they took the time to make sure that I fully understood the options and solutions they created for me. They listened to my needs, wants, concerns, and complaints with a patient ear and took the time to make sure that I was going to be happy with the end result.

Perhaps the part of my experience working with them that will stick with me the longest will be the involvement of the owner, Ted Moore. When needed, Ted was available to me regardless of the day or time. When a mistake made Ted would quickly step up, take ownership of the issue, and do everything in his power to address the situation. At times, those solutions cost him substantial amounts of money. But, as a man of his word, he was honest and took responsibility for the issue and the solution. I could not have asked for more and have experienced far less from other contractors on this and other projects.

I strongly recommend Moore Trosper Construction Company's involvement in any capacity in your capital improvement project. Their construction management services have been exceptional and their value to the project has exceeded expectations. As my grandma used to say, they are good people.

Please feel free to contact me if I can provide any more details regarding my experiences with MTCC.

Sincerely,

John Denney, Superintendent
