To Whom it May Concern,

I'm pleased to recommend Moore Trosper Construction as an excellent candidate to partner with your district in any construction or bond initiative capacity. I assumed my current role as Superintendent of Mason Public Schools in July of 2022. At that time, MPS was working to finalize the second series of a \$69.7 million bond proposal that was passed in 2017. The second series of the 2017 bond was a nearly complete renovation and addition to Steele Elementary School. I was immediately impressed with the work that Moore Trosper did in working with our Construction Manager, Christman Construction Company to complete the Steele project in time for the beginning of the 2022-23 school year. Now the new Steele is in its third year. It is a beautiful school that will serve the needs of Mason students and staff for years to come. I am most appreciative of the role that Moore Trosper played in making it a reality.

Moore Trosper also played a pivotal role in the third series of our 2017 bond. This phase was not as glamorous as series 2, but it was critically important. The projects included significant HVAC improvements at Mason High School along with security and technology upgrades at both Mason High School and Mason Middle School. Like in series 2, this portion of our bond was also completed in a timely and cost-effective manner. Once again, Moore Trosper played a key role in supporting the work of our CM and architectural firm in getting the work done on budget and on time. Early last fall, all projects funded by our 2017 bond were completed. We are now utilizing approximately \$200,000 of funds for classroom furniture at Mason High School.

Once again, I am pleased to recommend Moore Trosper as a strong partner for construction and bond work in your district. In a time of frequent supply chain disruptions and significant inflation, Moore Trosper partnered with Mason Public Schools to assist us in completing all of the work in our 2017 bond on time and on budget. I am confident that they would do the same for you.

Sincerely,

Gary Kinzer
